

Appendix K: FCC CapTel Mandatory Minimum Standards & Compliance Matrix

	FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.603	<p>Each common carrier providing telephone voice transmission services shall provide, not later than July 26, 1993, in compliance with the regulations prescribed therein, throughout the area in which it offers services, telecommunications relay services, individually, through designees, through a competitively selected vendor, or in concert with other carriers.</p> <p>Speech-to-speech relay service shall be provided by March 1, 2001.</p> <p>Interstate Spanish language relay service shall be provided by March 1, 2001.</p> <p>In addition, not later than October 1, 2001, access via the 711 dialing code to all relay services as a toll free call.</p>	<p>The Communications Act defines TRS as "telephone transmission services that provide the ability for an individual who has hearing or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio." Since TRS calls handled via captioned telephone VCO service fall squarely within this definition - i.e. they allow communications between persons with hearing or speech disabilities and persons without such disabilities - we conclude that captioned telephone VCO service falls within statutory definition of TRS. (§7)</p>	<p>Sprint has been a CapTel provider, on trial basis, since May 1, 2002. On January 1, 2004, Sprint successfully converted CapTel trial into a FCC-complaint CapTel service, first -ever in the TRS Industry.</p> <p>Speech-to-speech relay service for CapTel is waived by FCC. See Section 64.604 A.3.</p> <p>Sprint is also the first CapTel provider to offer intrastate and interstate Spanish services on January 1, 2004.</p> <p>Sprint is able to process inbound 711 calls to include access to CapTel services.</p>

FCC Requirement		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
Operational Standards			
§ 64.604 A.1	Communications Assistant (CA) Competency Skills	Requirement applies.	Sprint requires that all CapTel CAs have a high school graduate equivalency as a minimum qualification for the job.
	CAs are to be sufficiently trained to effectively meet the specialized communications needs of individuals with hearing and speech disabilities.	Use of CapTel's voice recognition software "is a permissible means for achieving the CA's competency skills required by the TRS mandatory minimum standards" (§39).	All CapTel CAs are tested and competent in typing, grammar, and spelling to ensure skills meet the following FCC Guidelines. CapTel CA training provides familiarity with hearing, deaf, and Speech-Disabled cultures.
	CAs must have competent skills in typing, grammar, spelling, and interpretation of typewritten ASL, familiarity with hearing and speech disability cultures, languages, and etiquette.	Waived. Interpreting typed ASL is not applicable.	A captioned telephone user does not type in making a call, therefore is never the opportunity for the CA to have to interpret typewritten ASL
	Typing Speed - 60 WPM with technological aids	Use of voice recognition technology in the provision of CapTel VCO service "is a permissible means for enhancing transmission speed." (§39)	CapTel's voice recognition technology transmits above 100 WPM.
	Oral-to-type tests	Waived. Permits use of Oral-to-text tests instead.	Oral to text tests are given to all CapTel CAs
§ 64.604 A.2	Confidentiality & Conversation Context	Requirement applies.	CapTel CAs are trained and evaluated to ensure all aspects of confidentiality are maintained and conversational context is properly provided.
	CAs are prohibited from disclosing the content of any relayed conversation regardless of content.	Requirement applies.	CapTel CAs are prohibited from intentionally altering a relayed conversation and will relay all conversation verbatim.
	CAs are prohibited from intentionally altering a relayed conversation and must relay all conversation verbatim unless specifically requested to do otherwise.		

	FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 A.3	<p>Types of Calls</p> <p>CAs are prohibited from refusing single or sequential calls or limiting the length of calls utilizing relay services.</p> <p>TRS shall be capable of handling any type of call normally provided by common carriers and can decline calls if credit card authorization is denied.</p>	<p>Waived for outbound calls (§ 46) because the CapTel CA is not involved in call set up and cannot refuse the call (§46)</p> <p>Not waived for inbound calls to a CapTel user made through a TRS facility. However, if call is made directly to the captioned telephone access number no set up is involved and the CapTel CA cannot refuse to call (§46).</p> <p>Requirement applies.</p> <p>Note: The requirement to provide 711 dialing is waived for outbound calls made from a CapTel phone. Inbound 711 calling waived for one year (8/1/03 - 7/31/04).</p> <p>Also STS and HCO are waived (§29).</p>	<p>CapTel users dial sequential calls directly therefore there is no way for a CapTel CA to refuse sequential calls or limit length of calls.</p> <p>CapTel will not refuse single or sequential inbound calls or limit the length of calls utilizing the service. If an inbound call is made to a captioned telephone user via the captioned telephone access number, set-up is automatic, and thus there is no way for a CA to refuse the call.</p> <p>CapTel is capable of handling all call types normally provided by common carriers.</p>
§ 64.604 A.4	<p>Handling of Emergency Calls</p> <p>Providers must use a system for incoming emergency calls that, at a minimum, automatically and immediately transfers the caller to the nearest PSAP.</p> <p>A CA must pass along the caller's number to the PSAP when a caller disconnects before being connected to emergency services.</p>	<p>Requirement applies.</p> <p>Requirement applies.</p>	<p>CapTel user dials 9-1-1. Sprint will route the call <u>directly</u> to the most appropriate PSAP.</p> <p>The 911 PSAP center will receive the caller's Automated Number Identification and Automated Locator Identification. If the call is disconnected, the 911 center will call the CapTel user back.</p>

		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 A.5	<p>In-call Replacement of CAs</p> <p>CAs answering and placing a TTY-based TRS or VRS call must stay with the call for a minimum of 10 minutes.</p>	Requirement applies.	CapTel CAs stay on all calls for a minimum of 10 minutes.
§ 64.604 A.6	<p>CA Gender Preferences</p> <p>TRS providers must make best efforts to accommodate a TRS user's requested CA gender when a call is initiated and, if a transfer occurs, at the time the call is transferred to another CA.</p>	Waived. (§ 36, 47-48).	
§ 64.604 A.7	<p>STS Called Numbers</p> <p>STS users must be provided the option to maintain a list of names and phone numbers that the STS user calls. When the STS user requests one of these names, the CA must repeat it and state the phone number to the STS user. This information must be transferred to any new provider.</p>	Waived. (§29)	
Technical Standards			
§ 64.604 B.1	<p>ASCII & Baudot</p> <p>TRS shall be capable of communicating with ASCII & Baudot format at any speed generally in use.</p>	Waived. (§53-54)	

FCC Requirement		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 B.2	Speed of Answer		
	TRS shall include adequate staffing to ensure 85% of all calls answered within 10 seconds by any method which results in the caller's call immediately being placed, not put in a queue or on hold.	Requirement applies	Sprint CapTel ensures that 85% of all calls are answered within 10 seconds and that caller's calls are immediately placed. Sprint does not put calls in a queue or on hold.
	Abandoned calls shall be included in the speed-of-answer calculation.	Requirement applies.	Abandoned calls are included in the speed-of-answer calculation.
	Speed of Answer is to be measured on a daily basis. The system shall be designed to a P.01 standard.	Requirement applies.	Sprint CapTel system is designed to a P.01 standard or greater measured on a daily basis.
§ 64.604 B.3	Equal Access to IXCs		
	TRS users shall have access to their chosen IXC carrier through the TRS and to all other operator services, to the same extent that such access is provided to voice users.	Requirement applies.	CapTel users will be able to choose their IXC carrier through the CapTel Carrier of Choice program allowing for the same access that is provided to voice users.

	FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 E.4	<p>TRS Facilities</p> <p>TRS shall operate everyday, 24 hours a day.</p> <p>TRS shall have redundancy features functionally equivalent to the equipment in normal central offices, including uninterruptible power for emergency use.</p> <p>Adequate network facilities shall be used in conjunction with TRS.</p>	<p>FCC noted that CapTel is not a mandated service but stated that CapTel is a form of enhanced VCO service. It allowed interstate reimbursement from the Interstate TRS Fund. For a provider to be eligible for reimbursement from the Interstate TRS Fund for the provision of TRS, the provider must either meet the mandatory minimum standards or request and receive waivers of the standards. (§ 22, 24)</p> <p>State TRS programs, of course, are free to offer this service and to reimburse providers of intrastate captioned telephone VCO service. (§ 22).</p>	<p>Sprint CapTel is available 24 hours a day, everyday.</p> <p>Sprint CapTel has redundancy features that provide functional equivalency, including uninterruptible power for emergency use.</p> <p>Sprint CapTel network facilities are sufficient to ensure that the probability of a busy response due to loop trunk congestion is functionally equivalent to what a voice caller would experience.</p>
§ 64.604 B.5	<p>Technology</p> <p>No regulation set forth in this subpart is intended to discourage or impair the development of improved technology that fosters the availability of telecomm to people with disabilities.</p> <p>VCO & HCO technology are required to be standard features of TRS.</p>	<p>FCC acknowledged that CapTel is an enhanced VCO service of TRS (§ 44).</p> <p>Waived for HCO. (§ 29)</p>	<p>Sprint is the nation's leader in the development and offering of technological features for TRS.</p>

	FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 P.6	<p data-bbox="467 216 683 260">Voicemail & Interactive Menus</p> <p data-bbox="467 304 748 447">CAs must alert the TRS user to the presence of a recorded message & interactive menu thru a hot key on the CA's terminal.</p> <p data-bbox="467 636 748 947">TRS providers shall electronically capture recorded messages & retain them for the length of the call, & may not impose any charges for additional calls that must be made by the user in order to complete calls involving recorded or interactive messages.</p> <p data-bbox="467 1056 716 1108">TRS will handle pay-per-calls.</p>	<p data-bbox="787 279 1036 300">Requirement applies.</p> <p data-bbox="787 590 1036 611">Requirement applies.</p>	<p data-bbox="1107 279 1388 646">CapTel user both hears and interacts directly with the recorded message and makes the selections as requested by the interactive menu. The CapTel user is alerted to the presence of a recording by hearing the recording and seeing the captions of the recording as the message is played.</p> <p data-bbox="1107 688 1388 1119">CapTel users can replay messages as required until the message is both heard and read as captions. The user can stay on the line as long as desired until the message is heard in its entirety or replayed. This is requested by the user directly. The CapTel user interacts with the recorded message system directly. This is treated as one call.</p> <p data-bbox="1107 1161 1388 1234">Sprint CapTel supports pay-per-call call types.</p>

Functional Standards

		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 C.1	<p>Consumer Complaint Logs</p> <p>States must maintain a log of complaints including all complaints about TRS to include minimum include the date the complaint was filed, the nature of the complaint, the date of resolution and an explanation of the resolution.</p> <p>States & TRS providers shall submit to the FCC by July 1 of each year, summaries of logs indicating the number of complaints received for the 12-month period ending May 31.</p>	Requirement applies.	<p>Sprint CapTel maintains a log of all complaints. The log includes all of the required fields including the date, the nature, the date of resolution, and the explanation of resolution.</p> <p>Sprint CapTel provides summaries of the logs, which indicate the number of complaints received for a 12-month period ending May 31st.</p>
§ 64.604 C.2	<p>Contact Persons</p> <p>States must submit to the FCC a contact person or office for TRS consumer information and complaints about intrastate TRS.</p>	Requirement applies.	Sprint CapTel provides full support, including a primary point-of-contact, to contract administrators to meet FCC requirements.
§ 64.604 C.3	<p>Public Access to Info</p> <p>Carriers, through publication in their directories, periodic billing inserts, placement of TRS instructions, in phone directories, DA services, & incorporation of TTY numbers in phone directories, shall assure that callers are aware of all forms of TRS.</p> <p>Conduct ongoing education and outreach programs to publicize availability of 711 access.</p>	Requirement applies.	Sprint follows all FCC requirements for public access to information and publishes in directories, brochures and billing inserts, instructions for TRS including 711 access in phone directories, DA services and the incorporation of TTY numbers in phone directories to assure that callers are aware of all forms of TRS.

	FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 C.4	<p>Rates</p> <p>TRS users shall pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from the point of origination to the point of termination.</p>	Requirement applies.	CapTel users pay rates no greater than the rates paid for functionally equivalent voice communication services.
§ 64.604 C.5	<p>Jurisdictional Separation of Costs</p> <p>(i) General, where appropriate, costs of providing TRS shall be separated in accordance with the jurisdictional separation procedures and standards set for in the Commission's regulations</p> <p>(ii) Cost recovery. Costs caused by interstate TRS shall be recovered from all subscribers for every interstate service, utilizing a shared-funding cost recovery mechanism</p> <p>(iii) Telecommunications Relay Services Fund - To be administered by the National Exchange Carrier Association, Inc. (NECA)</p>	Requirement applies.	<p>(i) Sprint follows FCC requirements in the jurisdictional separation of costs.</p> <p>(ii) Interstate CapTel is recovered from all subscribers of interstate services</p> <p>(iii) Sprint works with NECA for reimbursement of interstate minutes.</p>

		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
§ 64.604 C.6	Complaints		
	<p>(i) Referral of complaint,</p> <p>(ii) Intrastate complaint resolution,</p> <p>(iii) Jurisdiction of Commission,</p> <p>(iv) Interstate complaint resolution,</p> <p>(v) Complaint Procedures</p>	Requirement applies.	The Sprint CapTel Customer Contact process is fully compliant with all FCC Requirements.
§ 64.604 C.7	Treatment of TRS Customer Info		
	<p>Future contacts between the TRS administrator and the TRS vendor shall provide for the transfer of TRS customer profile data from the outgoing TRS vendor to the incoming TRS vendor. Such data must be disclosed in usable form at least 60 days prior to the provider's last day of service, and shall not be sold, distributed, shared or revealed in any other way by the relay provider or its employees, unless compelled to do so by lawful order.</p>	Requirement applies.	Sprint transfers CapTel customer data to incoming CapTel vendors. Customer information that is normally contained in a TRS profile is not required for CapTel as the CA is anonymous to the call and the CapTel user talks directly to the called party. The data is provided in usable form at least 60 days prior to the last day of service and is not sold, distributed, shared or revealed in any other way by Sprint, or Sprint employees unless Sprint is compelled by legal process to provide such information.
§ 64.605	State Certification		
	<p>Per FCC's Public Notice on TRS State Re-certification released 5/1/02, the FCC requests an application be submitted through State's Office of the Governor or other delegated executive office empowered to provide TRS.</p>	Requirement applies.	Sprint provides each Sprint TRS state a re-certification packet and assists in the re-certification process.

FCC Requirement		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
Availability of SS7 Technology to TRS Facilities	Concluded that if a TRS provider is able to transmit any calling party identifying information to the network, it must provide Caller ID service.	Requirement applies.	Sprint CapTel will have the capability to transmit the 10-digit number and will recognize the ID blocking indicators. Sprint CapTel will deliver the SS7 technology on February 1, 2004.
Types of Calls	Two Line VCO Two Line HCO HCO-to-TTY HCO-to-HCO VCO-to-TTY VCO-to-VCO	Minimum standards pertaining to HCO are waived. VCO requirements still apply.	Sprint CapTel supports the VCO calling combinations.
Handling of Emergency Calls	Concluded that TRS providers must use a system for incoming emergency TRS calls that at a minimum, automatically and immediately transfers the caller to an appropriate Public Safety Answering Point.	Requirement applies.	CapTel user dials 9-1-1. Sprint will route the call <u>directly</u> to the most appropriate PSAP.
Answering Machine Retrieval	Concluded that the answering machine and voice mail retrieval are TRS features that must be provided to TRS users. Answering machine retrieval through TRS is accomplished when the recipient of the message, the TRS user, calls the TRS facility and has the CA listen to the voice messages.	The requirement was not addressed in the Declaratory Ruling.	Answering machine and voicemail retrieval is provided by CapTel. Answering machine retrieval through CapTel is accomplished when the CapTel facility caption the voice message to the CapTel users.

FCC Requirement		FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
Call Release	<p>Concluded that call release is required under FCC's functional equivalency mandate.</p> <p>Call release allows a CA to set up a TTY-to-TTY call that once set up does not require the CA to relay the conversation. The feature allows CA to sign-off or be "released" from the telephone line without triggering a disconnection between two TTY users, after the CA connects the originating TTY caller to the called party's TTY through e.g. a business switchboard.</p>	Waived. (¶ 52)	
Speed Dialing	<p>Concluded that speed dialing feature is required under FCC's equivalency mandate.</p> <p>Speed dialing allows users to manually store a list of telephone numbers with designated speed dialing codes in the TRS user's consumer profile.</p>	The requirement was not addressed in the Declaratory ruling.	CapTel telephones have the Speed Dial feature.

FCC Requirement	FCC CapTel Declaratory Ruling (FCC 03-190)	Sprint's Commitment
<p>Three-way Calling</p>	<p>Concluded that three-way calling is required under FCC's functional equivalency mandate but did not specifically mandate the way such functionality had to provide.</p> <p>The FCC's Order imposing such requirement stated that "generally" three-way calling can be provided "in one of two ways." One way is for the TRS consumer to request that the CA set up the call with two other parties.</p> <p>The second way is to set up a three-way call is for TRS user to connect to two telephone lines at the same time from his or her premises by using the telephone's switch hook (or "flash") button.</p>	<p>Sprint CapTel users will be able to participate a three way call. Although the person using the captioned phone is unable to establish the three-way call, the called party will be able to do so by utilizing telephone switch hook (or "flash") button on his or her CPE. Thus, Sprint CapTel meets the requirement for three-way calling. (For One-Line CapTel.) For Two-Line CapTel either party can initiate a 3 way call should the user purchased this as a LEC option.</p> <p>Sprint CapTel users will be able to participate in a conference bridge to speak to three or more individuals.</p>

Appendix L: Sprint's Report to the FCC on VRS and IP Waivers

FCC Internet and Video Relay Service Annual Progress Report April 16, 2007

Waivers	IP Regulatory Status	IP Current Technology Issue/Limitations	Progress and Steps Taken to Meet the Requirement	VRS Regulatory Status	VRS Current Technology Issue/Limitations	Progress and Steps Taken to Meet the requirement
1. STS	Waived through 1/1/08	STS is not possible over the internet. Voice over IP (VoIP) **REQUIRES** Quality of Service. QoS means that all the associated data packets arrive in one contiguous stream and in order. In the "internet" world, there are many segments owned by multiple providers using dis-similar routers. Some support QoS, some do not. There is, at this time, no universal, cooperative methodology to address the internet deficiencies.	In research and development stage. Sprint is investigating and evaluating several VoIP to determine acceptable QoS levels to support STS calls. Sprint is also investigating LAN/WAN systems where QoS can be controlled internally.	Waived Indefinitely; No report required	NA	NA
2. Spanish Relay	NA	NA	NA	Compensable but non-mandated service.	NA	Sprint provides ASL to Spanish Video Relay Service.
3. Types of Calls	NA	NA	NA	Waived through 1/1/08	Voice over IP(VoIP) requires Quality of Service. QoS means that all the associated	We are currently providing two-line VCO and HCO controlled at

Waivers	IP Regulatory Status	IP Current Technology Issue/Limitations	Progress and Steps Taken to Meet the Requirement	VRS Regulatory Status	VRS Current Technology Issue/Limitations	Progress and Steps Taken to Meet the requirement
			compatible.			ISDN protocols are not compatible.
13. HCO - to - HCO	Waived through 1/1/08	As explained in number three above, voice quality over the internet is not universally effective at this time.	Sprint's Internet Relay Service is not designed to connect an inbound internet caller with the called party who uses TTY user or HCO as communication between internet and baudot protocols are not compatible.	Waived through 1/1/08	As explained in number three above, voice quality over the internet is not universally effective at this time.	Sprint's Video Relay Service is not designed to connect an inbound video caller with the called party with uses voice, TTY user, VCO, HCO or anything other than video because videoconferencing via internet or ISDN protocols are not compatible.
14. Call Release	Waived through 1/1/08	An Internet Relay caller utilizes IP data to place an inbound call. The Call operator connects the outbound dialing voice call utilizing Signaling System 7 (SS7). Since these two types of calls are not compatible, the call release feature is not technically feasible.	It is not technically feasible at this time to provide call release features with Internet Relay calls. However, Sprint will continue to investigate new developments to allow Internet Relay customers to use this feature.	Waived through 1/1/08	A VRS customer utilizes a video connection to make an inbound call. The VRS operator utilizes a voice channel (SS7) to make an outbound dial. Because the two types of calls are not compatible, the call release feature is not technically feasible. Also, in the VRS environment, we are currently unable to remove the Video Interpreter	It is not technically feasible at this time to provide call release features with Video Relay calls. However, Sprint will continue to investigate new developments to allow Video Relay customers to use this feature.

					agent from the middle of the call when the inbound video caller reaches an outbound customer who also has video capability.	
15. 3-way Calling	Waived through 1/1/08	The current Internet Relay call environment does not support the capability to perform three-way calling initiated call from agent via Sprint IP.	It is possible for the customer to initiate a three-way call if he/she has conference calling capability. In this case, the operator does not needed to perform the three-way calling function. However, the limitation is that Sprint's Internet Relay Service will handle only one TTY user (and unlimited number of voice users) when using three-way calling via relay service. It is possible to have 2-Line VCO via Sprint IP using user-initiated three-way calling.	Waived through 1/1/08	At this time, it is not technically feasible to provide a 3-way Video Relay call. Customers using VRS do not have the web-enabled ability to initiate 3-way video calls because of the limitations of end user equipment. Features of customer premise equipment are not under the control of the VRS provider, and therefore the VRS provider cannot control the establishment of a three-way call.	The voice customer is currently able to use the LEC-provided three-way calling feature. One or two of the three legs of the call can be engaged as they would without VRS being a part of the call. VRS is transparent to this process. The VRS agent who receives an inbound video connection has the ability to out dial to multiple voice parties to create a three-way call of which two parts are voice and one part is video. The VRS agent platform is however, unable to support a three way call

						between two video customers and one voice user at this time.
16. Speed Dialing	Waived through 1/1/08	Sprint's current Speed Dial system is supported by ANI driven customer profile. Without being able to identify the customer's ANI, Sprint is not able to access the preferred speed dial list.	Customers can maintain their own speed dial list on their computer and paste the phone number on the web prior to the call. The phone number will be pre-populated to agent's dialing window for efficient call processing.	Waived through 1/1/08	This service is currently available for VRS customers who choose to use our webcam based product. They can create a speed dial list online and greatly improve the efficiency and connect time with the outbound party through the Video Interpreter. Individuals using TV-based videophones do not have this web enabled ability to speed dial through VRS because of the limitations of this type of end user equipment. Features of customer premise equipment are beyond the control of the VRS provider and determine how the customer can interact with Sprint's platform.	Individuals using TV-based videophones do not have this web-enabled ability to speed dial through VRS because of the limitations of this type of end user equipment. Appendix M: Sprint Relay Fact Sheet

Sprint Relay

www.sprintrelay.com

Sprint is the leading provider of relay services in the United States so that those who are deaf and hard of hearing can have anytime, anywhere communications. With 16 years of experience in providing Telecommunications Relay Services (TRS), Sprint is the relay service provider for 31 states plus the Commonwealth of Puerto Rico, New Zealand and the federal government. Sprint has been awarded the following state TRS contracts:

Alabama	Indiana	New Mexico	Texas
Alaska	Illinois	New York	Utah
Arkansas	Massachusetts	North Carolina	Vermont
California	Minnesota	North Dakota	Washington
Colorado	Mississippi	Ohio	
Connecticut	Missouri	Oklahoma	
Delaware	Nevada	Oregon	
Florida	New Hampshire	South Carolina	
Hawaii	New Jersey	South Dakota	

TRS enables standard voice telephone users to talk to people who are Deaf, Hard of Hearing or Speech-disabled on the telephone. Under Title IV of the Americans with Disabilities Act, all telephone companies must provide free relay services either directly or through state programs throughout the 50 states, the District of Columbia, Puerto Rico and all of the U.S. territories. Sprint Relay's experience in the field provides the assurance that all services delivered will meet or exceed Federal Communications Commission mandates for TRS.

Sprint Relay Services

Traditional relay services involve a relay operator serving as an intermediary for phone calls between a deaf, hard of hearing and speech-disabled user and a hearing party. The TRS operator speaks words typed by a deaf user on a text telephone (TTY) or via the Internet and relays the hearing person's spoken response by typing back to the deaf user.

Emerging Technology:

Under the Americans with Disabilities, all telephone companies are required to pay a percentage of the money that they collect from their subscribers into a national telecommunications relay services fund. This interstate fund is administered by NECA (National Exchange Carriers Association).

Currently, two technologies are funded through NECA – video and Internet relay services. There is strong competition in the TRS industry due to the fact that no state contract is required in any state to process calls through the Internet.

Video relay services (VRS) provides American Sign Language (ASL) users with an attractive alternative that offers them the opportunity to communicate by video conferencing using ASL their native language, which may be preferred over the traditional TTY relay service. VRS requires users to have a personal computer or television monitor, a Web camera or videophone and high-speed Internet connectivity such as cable and DSL. Sprint Video Relay, powered by CSD (Communication Services for the Deaf), is a free service through the Internet that enables the deaf or hard of hearing user to communicate in ASL to a hearing or standard telephone user. Sprint Relay and CSD launched the first nationwide Video Relay Service in May 2002. To connect with a video interpreter, visit www.sprintvrs.com.

Sprint IP Relay is also a free service that combines TRS with the ease and ubiquity of the Internet, allowing users to make calls from any PC or selected Web-enabled Internet wireless devices without having to use traditional TTY equipment. Sprint IP Relay users also have the flexibility of using AOL Instant Messenger to access Sprint IP Relay. To connect using a website, go to www.sprintip.com. To connect using AOL Instant Messenger, send a 10-digit number to the screen name **SprintIP**. Both access methods will connect the caller to an experience Sprint Relay operator.

Sprint IP Wireless Relay is a new service that allows customers who are deaf, hard-of-hearing or who have a speech disability to use wireless relay services on a select number of wireless devices:

- 1) BlackBerry phones (with an operating system 4.0 or higher). Customers can use this service to communicate with any standard or mobile telephone user in the United States via a free downloadable application at www.sprintrelay.com/download/. Users simply select a contact from their address book or enter a phone number with accompanying text instructions to a Sprint IP Relay Operator.
- 2) PPC6700 devices – To download the free Sprint IP Wireless application, go to: www.sprintrelay.com/download/treo.

Sprint IP Wireless allows users to have the mobility to make a relay call when they need to without a TTY or computer and can be assured the connection is with an experienced Sprint Relay operator.

CapTelSM (Captioned Telephone) relay service is a leading-edge technology developed by Ultratec, Inc. of Madison, Wis., that allows people to receive both voice and text captioning, nearly simultaneously. A special, *CapTel*-equipped phone is required in order to place a call through the *CapTel* relay service. The *CapTel* phone works like any traditional phone with callers talking and listening to each other, but with one very significant difference – captions are provided live for every call. The captions are displayed on the *CapTel* phone's built-in screen so the user can read the words while listening to the voice of the other party. For more information on CapTel, visit www.captionedtelephone.com.
